- Crime levels have remained relatively static: 1.5% increase in 2017/18 compared to the previous year.
- The number of Arson and Criminal Damage, Burglary Dwelling, Burglary Non-Dwelling, and Theft offences have all decreased.
- Theft from motor vehicles has risen and is attributed to a rise during the summer of Vans being targeted and also insecure vehicles within the city
- The largest increase has been for Possession of Weapons offences: up 65.4%. This compares to a Force increase of 43.7%.
- This is predominantly due to an increase in the number of crimes of possession of a blade or pointed article in public.
- To some extent, this rise in recorded offences can be linked to increases in pro-active police work, including Operation Gravity and County Lines which focus on combatting drug crime.
- Nationally, offences involving a knife or a sharp instrument are at the highest level recorded since comparable data began to be collected in April 2010, with most Forces experiencing an increase. However, they are still relatively rare.
- The total increase for all crime in Norwich of 1.5% compares to a national increase of 6%**.
